Lesson Assessment

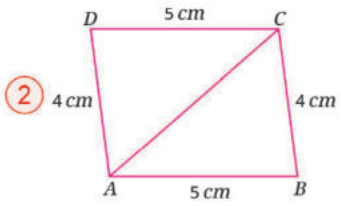

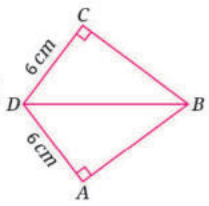

First **Measuring Conceptual Understanding**

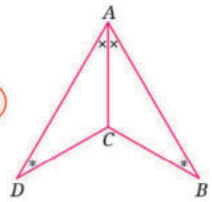

▸ **In each of the following, what is the case used to prove that the two triangles are congruent?**

① 

② 

③ 

④ 

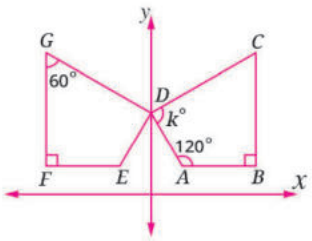

▸ **Choose the correct answer from the given ones:**

⑤ In the given figure: The polygon $EFGD$ is the image of the polygon $ABCD$ by reflection in the y-axis.

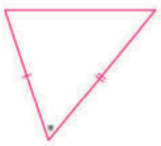

What is the value of k?

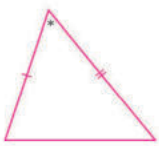

(a) 90 (b) 60

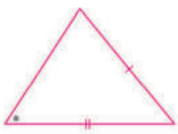

(c) 120 (d) 70

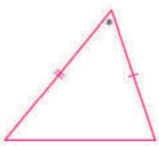

⑥ Which of the following triangles is not congruent to the other triangles?

(a)

(b)

(c)

(d)

▸ **Spot the mistake:**

⑦ Ahmed used the triangle congruence to find the value of $\mathcal{X}$.

Find the mistake in Ahmed's solution, then correct it.

Ahmed's solution:

$4\mathcal{X}+6=3\mathcal{X}+9$

$\mathcal{X}+6=9$

$\mathcal{X}=3$
