▸ **Choose the correct answer from the given ones:**

4 What is the type of the angle supplements an acute angle?

(a) Acute (b) Obtuse

(c) Straight (d) Reflex

5 What is the type of the angle complements a right angle?

(a) Acute (b) Obtuse

(c) Zero (d) Straight

6 If the angles A and B are complementary, and $m(\angle A) = 40°$, what is the measure of $\angle B$?

(a) 40° (b) 50°

(c) 90° (d) 140°

7 What is the measure of the angle that supplements an angle of measure 34° 60'?

(a) 55° (b) 56°

(c) 145° (d) 146°

▸ **Discuss:**

8 Mariam and Sandy were asked the following question:
What is the measure of one of two complementary angles if the difference between their measures is 12°?
Which of the two solutions is correct?
Explain why the results are different.

Mariam's Solution:

$x + (x - 12°) = 90°$

$2x - 12° = 90°$

$2x = 90° + 12° = 102°$

$x = \frac{102°}{2} = 51°$

Sandy's Solution:

$(90° - x) - x = 12°$

$90° - 2x = 12°$

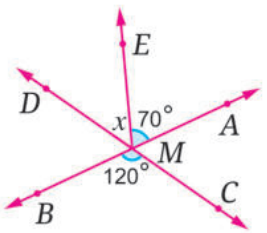

$2x = 90° - 12° = 78°$

$x = \frac{78°}{2} = 39°$

Second Applying Scientific Concepts

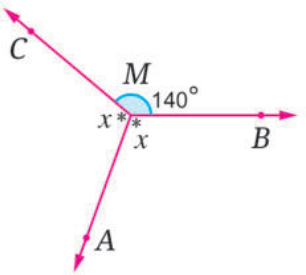

▸ **Find the value of x in each of the following:**

9

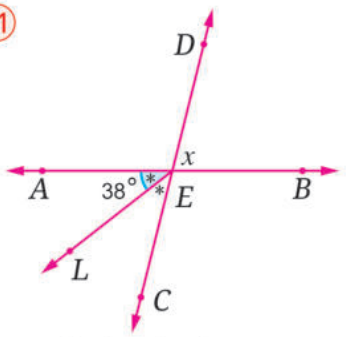

$\overleftrightarrow{AB} \cap \overleftrightarrow{CD} = \{M\}$

10

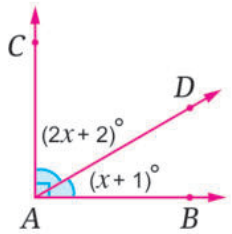

11

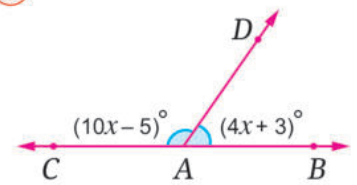

$\overleftrightarrow{AB} \cap \overleftrightarrow{CD} = \{E\}$

12

13

$A \in \overleftrightarrow{BC}$
